Chapter-I

Introduction and Background

The Directorate of Economics and Statistics, J&K is participating in the survey being conducted by NSSO, MOSPI, and Government of India since 1954. NSS work is being conducted on double matching pattern and samples are covered in the ratio of 2:1 by state and central Government respectively. During the period 1st July, 2010 to 30th June, 2011, DES has also participated in the enterprise survey on “Operational and Economic characteristics of unincorporated non –agricultural enterprises in Manufacturing, Trade & Other services sector (Excluding construction)”.

Directorate of Economics and Statistics, J&K, Jammu has undertaken the pooling exercise of validated sample data of NSS 67th round by applying the pooling software Poolability tests, received from DPD, NSSO, through the official of DES who attended pooling workshop held on 18th -19th of June, 2015. Detailed results are also available in excel sheet and print files generated through the pooling software.

Parameters considered for pooling:

Considering the smaller sample size at district level following broad parameters were considered for pooling:-

- a) District wise estimated number of enterprises and workers by sector, enterprise type [OAE(own account enterprise), EST(establishment), ALL] and BAC [broad activity category: Manufacturing(MFG), Trade and Services]
- b) State level estimated enterprises and workers by sector, enterprise type (OAE, EST, ALL) and CC (compilation category: 63 NAD CC)
- c) District wise emoluments per hired worker in establishments by sector and BAC
- d) State level emoluments per hired worker in establishments by sector and CC (63 NAD CC)
- e) District wise GVA per enterprise by sector, enterprise type (OAE, EST, ALL) and BAC
- f) State level GVA per enterprise by sector and CC (63 NAD CC)
- g) District wise GVA per worker by sector, enterprise type (OAE, EST, ALL) and BAC
- h) State level GVA per worker by sector and CC (63 NAD CC)

1.1 Testing the Poolability of two sets of data:

District wise following tests were undertaken.

- a) District wise Wald-Wolfowitz run test for GVAPW by BAC for central and state sample separately for OAE and EST [non parametric Z-test]
- b) District wise divergence test for GVAPW by BAC for central and state sample separately for OAE and EST (Establishments) between central and state samples [parametric Z-test]
- c)

Sample size:

Total Sample size during NSS 67th round in J&K state:

In J&K state, 560 samples were allotted consisting of 336 rural villages (samples), and 224 urban blocks (UFS). Out of which 212 rural samples were surveyed and 145 urban blocks were surveyed.
